Circular FS/2026/07: Fertiliser Subsidy for the 2026/27 Maha Season

1. Purpose

This circular sets out how paddy farmers may claim the fertiliser subsidy voucher for the 2026/27 Maha season. It replaces Circular FS/2025/11.

2. Who is eligible

A farmer is eligible if the paddy land is registered with the local Agrarian Service Centre and the farmer is listed as the cultivator for the 2026/27 Maha season.

The subsidy covers a cultivated extent of up to two hectares per farmer. A farmer cultivating more than two hectares receives the subsidy for the first two hectares only.

Land that was left uncultivated in both of the last two seasons is not eligible unless the Agrarian Development Officer certifies that it will be cultivated this season.

3. How to claim

The farmer submits the claim form at the Agrarian Service Centre with the land registration number and a copy of the national identity card. The officer issues a voucher for the eligible extent.

Claims for the 2026/27 Maha season close on 15 November 2026. Claims received after this date are not accepted.

Vouchers can be redeemed only at outlets authorised by the Agrarian Service Centre and only for the fertiliser types listed on the voucher.

4. Mandates attached to the subsidy

A farmer who receives the subsidy must not burn paddy straw in the field. Straw must be incorporated into the soil or removed.

Fertiliser bought with the voucher must not be resold. A farmer found reselling subsidised fertiliser loses eligibility for the next two seasons.
